

PSL

Pocket Strand Layering System

The Leggett & Platt PSL System accepts pocket spring strands directly from a coil machine and neatly layers them into a specific area/container.

Electronic sensors and switches automatically guide the machine, as it moves on an X-Y axis, throughout the layering cycles until the containing space is full. The system may be free-standing or mounted to the ceiling to better utilise space.

General Specifications:

- Maximum Coil Height – 225 mm
- Packet Material – All
- Maximum Layering Speed – 16 m / minute
- Nominal Layering Speed – 10 m / minute
- Installed Power – 0.8 kw
- Power Supply – 400 v, 3 phase, 50hz
- Approximate Machine Weight:
 - 370 kg excluding support legs
 - 510 kg including support legs
